

JC-14.2 Wafer Level Reliability Activity at IIRW

Sessions for informal discussions and work on existing or proposed standards will be held evenings for those interested in participating. Standards presently under consideration include JP 001, Foundry Qualification Guidelines, a proposed Standard on stress-induced-voiding (SIV), and revisions to the standard on Hot Carrier Injection.

The formal face-to-face meeting will begin at 1:00 PM on Thursday afternoon, 10/20, after the IIRW ends. The location will be at the Inn by the Lake -- (530) 542-0330 -- in South Lake Tahoe, and will end at 1:00 PM on Friday, 10/22/11. Attendees should make their own reservations for overnight accommodations.
